

Entity  
compliance and  
governance

As regulatory scrutiny increases, and legal entity compliance and global subsidiary structures become more complex, multinational companies face growing operational, governance and reporting challenges. Increased collaboration between regulatory and tax authorities also means that the subsidiary board governance needs to align with and support your tax structure. Organizations that lack standardized policies and procedures to address these obligations may risk non-compliance fines, liability issues and reputational damage.

**Helping companies navigate the evolving landscape of corporate governance**

What if you could:

- ▶ Rest assured in timely disclosure of accurate corporate data
- ▶ Ensure that subsidiary board governance aligns with, and supports, your tax structure
- ▶ Have access to a single, accurate source of corporate data
- ▶ Spend less time on administrative tasks without adding undue risk

HVG Law legal managed services (LMS) assists multinational companies in meeting their legal entity obligations efficiently and cost effectively on a global scale. We deliver an integrated and holistic approach across the legal entity lifecycle. Key services fall into three distinct areas:

**Annual compliance activities**

Facilitate annual statutory filing requirements to maintain an entity's legal good standing, including the following:

- ▶ Board and shareholder minutes

- ▶ Renewal of annual returns or trade licenses
- ▶ Preparing documents for annual general meetings
- ▶ Annual statutory filing with local company registers
- ▶ Updating legal entity data and org-charting

**Routine compliance activities**

- ▶ Coordination of entity changes (e.g., director or officer replacement, powers of attorney, change of address or name)
- ▶ Support of transaction-related items (e.g., acquisitions and divestitures)
- ▶ Execution of incorporations and dissolutions

**Advisory and special projects**

- ▶ Perform health checks and transformation reviews
- ▶ Assess program design, governance model evolution and risk-based categorization of subsidiaries
- ▶ Conduct governance analytics, diagnostics and benchmarking
